

25X1A

MEMORANDUM FOR: [REDACTED]

12 July 1955

SUBJECT : Cable Deliveries

1. I am returning herewith your two most recent memoranda on the above subject.

25X1A

2. With respect to dispatches, I agree with the view implied in paragraph 1 of your memorandum of 5 July to the effect that we should not try to use the [REDACTED] channel. I assume you will work out arrangement whereby RYBAT dispatches bearing our project indicator will go directly to 2210 E.

3. On the matter of cables it certainly would be ideal to have messages delivered directly to 2210 E by the Signal Center. The only question I have is whether we will not find that we have to make at least two or three copies of most of our messages. I believe the DD/P and the DCI will want to follow them pretty closely. Also a number of messages will be of interest to the Director of Communications and the Director of Security. Since I am not entirely clear what functions the Cable Secretariat performs, I do not know exactly what obligation we would be assuming. I suggest you discuss this phase of the matter with Mr. Cunningham and let me have your recommendations.

25X1A

4. If we decide that we would like to have cables delivered directly by the Signal Center, I believe you should have another talk with [REDACTED] to make sure that we are not acting improperly in his view.

25X1A

RICHARD M. BISSELL, JR.
Senior Project Officer
